

HEALTHY SKIN WITH MAKEUP?

BY: KRISTINA MONIQUE

Makeup LOVERS deep down inside we all want to do our part on going GREEN, right? Even those of us who like to beautify ourselves with some of the non-natural stuff that the world has to offer. Well let's try something healthier for your skin, mineral makeup. I know you think makeup and healthy skin not possible well SURPRISE!!! I'm sure you have heard some not so great reviews about it but I bet you've also heard some AMAZING reviews as well. All I have to say is pure great things. I'm definitely one of those who truly believe in mineral makeup because of the healing powers it has while making us beautiful.

One of my ultimate favorites is definitely La Bella Donna (right) a mineral based line with the ability to offer SPF, color and anti-inflammatory properties to the skin. Not only are these products all minerals derived from rocks but they have no FD&C dyes, oils, talc, alcohol or fragrance. Don't get me wrong, I love my product based lines that aren't so natural that I like to use for photography, editorial and those days that I don't want to feel so natural myself but why not go outside of our box. They are anti-aging with light reflectors to create a more flawless appearance, healing, and great for problematic skin because it doesn't clog the pores (SCORE). Really the list goes on and on plus you can put these minerals on your face after any type of treatment, which I find rather rewarding myself. With that I give you a challenge to give back to the earth by using resources that are natural and non-toxic for your skin, the Egyptians did it and I do recall Cleopatra being quite beautiful so mineralize your life.
